

## Sri Sudewi/ PhD

	<p>Nationality : Indonesian</p> <p>Language : Indonesia, English, Arab, some ethnic languages</p> <p><b>Autobiography:</b></p> <p>Research is to create, discover new something, change to be good new something and the result should be useful for the knowledge intention and benefit to humanity. From the learning by doing, trial and error, it may help us for getting the newly one and concern on it. It consistent with quote by Wernher von Braun ‘Research is what I am doing when I don’t know what I am doing’.</p> <p>Acting as PhD student, I feel the PhD life is not only about study and research but also the entire life how to be professional of student, researcher, manager and apart of society and community. The time management is play crucial role during PhD life. How to face failure of research and wake up to reach the fabulous observation, investigation and yields the satisfy result. Of course, be patient, under controlled should be needed to balance of such feelings.</p> <p>I do research during my PhD under principle investigator by Prof. Chien Hung Li (Henry) in Lab Organic Synthesis and Nanophotonic. I work about nano materials from polymer and its application on drug release. I synthesize gold nano particle with modified reducing agent, polymer and grafted to chitosan. The success synthesize will be applied in drug delivery system.</p>

Doctoral:

Institute: Kaohsiung Medical University, Kaohsiung city, Taiwan

Research field: Organic synthesis and nano material

Thesis supervisor / Co-advisor: Dr. Chien Hung Li (Henry)

Master:

Institute: Universitas Gadjah Mada, Yogyakarta, Indonesia

Research field: Pharmaceutical analysis

Thesis supervisor / Co-advisor: Prof. Subagus Wahyuono, M.Sc.,Apt. and Puji Astuti,

M.Sc.,PhD.,Apt.

Publications:
