	<p><b>Autobiography:</b></p> <p>My name is Jaya Kishore Vandavasi and I was born on 29th August 1981 in Nellore, Andhra Pradesh, India. My studies from Kindergarten to Bachelor's degree were done in Nellore. Moved to Sri Venkateswara University, Tirupathi in 2003 for my masters and obtained degree in 2005. After that joined in AVRA Labs from 2005-2006 as a Junior Research Scientist. From there went to Chembiotek, Kolkata as Research Chemist from 2006-2010. I decided to do PhD studies and Prof. Jeh-Jeng Wang from Kaohsiung Medical University given me a golden opportunity to prove myself in his group. My professor support was extraordinary through my research by giving suggestions and directing me in a right path. I really proud to be in his group. Research area was in development of new methodologies by using bases and metals. My PhD duration from September 2010 to December 2013 and continued as a Post Doctoral Fellow with Prof. Jeh-Jeng Wang group from January 2014 to July 2015. Prof. Jeh-Jeng Wang recommended me to Prof. Wen-Shan Li in Academia Sinica and I am there for one year. In 2016, I got opportunity to do my Post Doc with Prof. Stephen G. Newman from University of Ottawa, Canada. I joined in his group from August 2016-June 2018. My research was to develop new coupling reactions and published in my dream Journals Angew. Chem. Int. Ed., and J. Am. Chem. Soc. From there I joined with Toronto Research Chemicals, Toronto, Canada.</p>
